

PROLOGUE

First and foremost, I would like to thank Allah Swt. for giving me strength, knowledge, ability, and opportunity to finish this thesis. The purpose of this writing is to fulfill one of the requirements to get a bachelor's degree in Economics from the Department of Economics, Faculty of Economics and Business, Universitas Padjadjaran. In this occasion, I would like to thank everyone who has supported me through this process from the beginning until the end, this thesis is dedicated to:

1. Ekki Syamsulhakim, S.E., M.Appl.Ec., as the one and only thesis supervisor who is patient and willing to make time to give guidance, feedback, and solution to all my problems and questions during thesis writing.
2. Witra and Ghea, my very first friends in college who turned out to be my closest friends, who are always together with me from the beginning of semester until now. I could not survive college life without both of you.
3. Kinanti, who struggle together with me to finish this thesis. You are a good friend to exchange ideas, ask questions, discuss about thesis and even about life. We finally made it, Nan!
4. Amatul Ghina, my best teaching assistant who is like my own sister. Thank you for your time, insight, and experience you have given me.
5. All of my family and my friends that I could not mention one by one, thank you for the prayers, supports, and advices. I am very happy to be surrounded by good people.

The last but definitely not the least, thanks to Andri Noer Bijanti and Dinan Sufendi Rae, my caring and loving parents, who are always sending me prayers and giving me endless supports. Addina Mahardhika and Zahira Mahardhika, my love-hate-relationship sisters. Even though the distance separates us, you will always be my 911 to share every joy and every sorrow. At the very end, I would like to present my special thanks to my dearest and lovely cats who bring so much happiness in my life, I feel grateful.
